2011 HIV/AIDS summary: DHEC Public Health Region 7

New HIV infections (including AIDS cases), 2009-2010

Region 7 includes three counties: Berkeley, Charleston and Dorchester.

HIV infected people are the #1 priority population for HIV prevention services in S.C. For the two-year period 2009-2010, 251 people were newly diagnosed with HIV in the counties comprising Region 7. This represents 16 percent of the total cases diagnosed in South Carolina. The number of new cases diagnosed and reported in Region 7 during 2009-2010 increased by 26 percent compared to the 2003-2004 period.

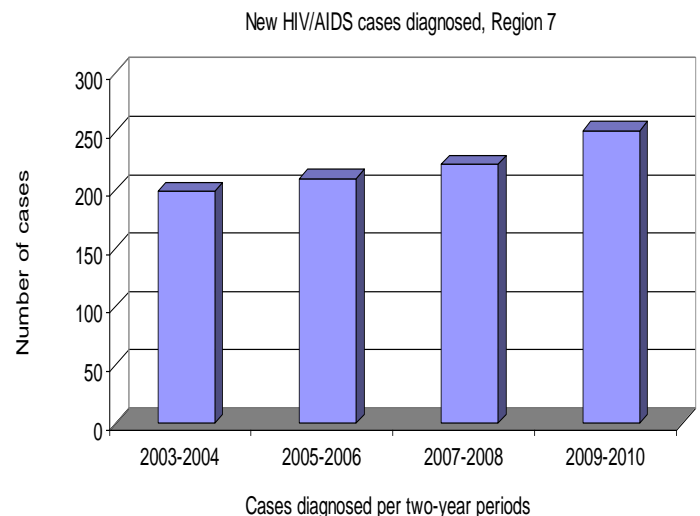

By gender, 75 percent of new HIV/AIDS cases occur among men; 25 percent are among women.

By risk, among the 167 people who report risk in Region 7, men who have sex with men (MSM) represent the largest proportion of recent infections (74 percent), followed closely by men who have sex with women (MSW) and women who have sex with men (WSM) (21 percent); three percent are both men who have sex with men and injecting drug users

By race/ethnicity, among people diagnosed with HIV/AIDS in Region 7, 73 percent are African-American; 19 percent are white; five percent are Hispanic. African-Americans have a case rate eight times greater than whites in Region 7.

Among women recently diagnosed with HIV/AIDS in Region 7, most are African-American (81 percent); 17 percent are white. Of the 25 women reporting risk, 92 percent indicated heterosexual sex as their exposure to HIV.

Among men recently diagnosed in Region 7, 70 percent are African-American; 20 percent are white; six percent are Hispanic. Of the 139 men reporting risk, 88 percent are men who have sex with men, six percent are exposed through heterosexual sex; four percent are both men who have sex with men and injecting drug users.

Region 7 (continued)

Total people living with HIV/AIDS through December 2010*

As of December 2010, 2,200 people have been reported living with HIV infection (including AIDS) who are residents of Public Health Region 7. This represents 15 percent of the S.C. total. Of these, 1,564 are men and 636 are women. Most people (1,256) are ages 25-49; 29 are children and teenagers under 20 years of age.

As with new infections, African-Americans are disproportionately impacted. Most (43 percent) of the people living with HIV in Region 7 are African-American men, 24 percent are white men, 23 percent are African-American women and five percent are white women. Four percent of people living with HIV are Hispanic/Latino.

Most (49 percent) people living with HIV who reported risks are men who have sex with men; 32 percent are men and women exposed through heterosexual sex; 12 percent are injecting drug users; five percent are both men who have sex with men and injecting drug users.

HIV infected people are the #1 priority population for HIV prevention services in S.C.

Among remaining priority populations for HIV prevention services:

2010-2014 S.C. HIV prevention plan priority populations ^(1,2)	2009/2010 diagnosed HIV/AIDS cases by population % of total cases w/risks identified (167 Total) **	People living with HIV/AIDS, 2010 by population % of total cases w/risks identified (1,627 Total)
2. African-American MSM	52%	24%
3. African-American WSM	11%	17%
4. African-American MSW	5%	9%
5. White MSM	16%	23%
6. IDU	***	12%
7. Hispanic/Latino	♦see note below ³	

****Caution: Due to small numbers, must interpret recent case proportions with caution.**

*****Cells with 3 or fewer cases are set to missing.**

NOTES:

1. Populations: MSM = Men who have Sex with Men; IDU = Injecting Drug User; WSM = Women who have Sex with Men; MSW = Men who have Sex with Women.
2. Epi Profile Data: Based on number of people with known risk; excludes number of "No Risk Reported". Priority population percentages do not include the combined risk of MSM and IDU.
3. In 2010, Hispanics/Latinos made up 5.3 percent of the population of DHEC Public Health Region 7. Among people recently diagnosed with HIV/AIDS in Region 7, five percent are Hispanic/Latino. Four percent of people living with HIV in the health region are Hispanic/Latino.

*Prevalence data is provisional; death updates not available.
